Sediment disaster warning area, etc.

- Sediment disaster special warning area Steep slope collapse
- Sediment disaster warning area Steep slope collapse
- Sediment disaster special warning area Debris flow
- Sediment disaster warning area Debris flow
- Sediment disaster warning area Landslide

Expected inundation depth

- 10.0m to 20.0m
- 5.0m to 10.0m
- 3.0m to 5.0m Flooding up to the second floor
- 0.5m to 3.0m Flooding up to the first floor
- Less than 0.5m Flooding below the floor level

Estimated area of building collapse by flood (Area where residents must evacuate quickly)

- Riverbank erosion area
- Flooding flow area

Designated shelter

- City hall buildings
- Fire station
- Police station
- Facilities for people requiring special care
- Water-level observatory
- River camera
- Elevation (m)

Designated emergency evacuation site

Designated emergency evacuation site and Designated shelter

Designated welfare shelter

Facilities for people requiring special care (As of January 2025)

Chikuma City Flood and Landslide Disaster Hazard Map

Mori, Kurashina, Hanyu & Goka (Uchikawa/Kobuneyama) District

The Flood and Landslide Hazard Map shows areas that may be inundated if the Chikuma River or rivers administered by Nagano Prefecture (Sawayama River, Sarashina River, etc.) overflow due to the maximum expected rainfall, and areas that may be damaged if a landslide or other disaster occurs. Check the evacuation sites and routes on this map to prepare for disasters. Also, actively participate in disaster drills organized by the community.

Chikuma City General Affairs Department, Crisis Management and Disaster Prevention Division
